Med Open Fly : Flat Retractable Fabric Pergola

Roof System: Retractable

Page 1 of 2

 **Video**

A unique motorised all weather retractable roof pergola system from Gibus. Patented pantograph sliding system with stainless steel components enhances the design and holds the fabric taut. Freestanding or leaning version available.

In Summary

Polished stainless steel side pantographs which give the unique zigzag appearance. Powder coated aluminium and stainless steel structure with 130 mm guides and 70x130 mm crossbeams, upright and post profiles. Blockout PVC coated polyester fabric which protects from harmful UV rays.

Key Features

Pantograph Closing

The pantograph puts the fabric in tension through the elastic system given by the lateral springs to achieve the best wind resistance.

Pantograph Opening

The movement of the roof can be done by a manual winch or by a motorised system. Even when the fabric is folded back, water flow is guaranteed.

Discharge Of Water

The side pantographs that characterise the system are pulled and slightly arched to divert rainwater, allowing it to drain laterally.
