The Stobag Pergolino stands out with its sleek design backed by proven, robust technology. The awning protects against UV radiation and with the right pitch and a tensioned water-repellent fabric, it also protects against rain - with integrated water channel for lateral rainwater drainage. Dimmable LED lighting in various shades of white bathe your evenings in a cosy light. It is designed for a maximum projection of up to 6 metres overhang - perfect for large patios in the restaurant and private sectors.

With three guides

Product Features

Shading of large areas up to 90 metres squared. High rigidity and flexible bracket distribution thanks to 4-edge back bar. The Jumbo cover remains consistently taut and high thanks to the telescopic arm technology; up to six specially developed telescopic arms are used to ensure a consistently high fabric tension across the entire area in every position. Even at its maximum size of 18 x 5m, Jumbo remains utterly calm and stable. This is thanks to the sturdy aluminium construction. Self-aligning bearings for the roller shaft guarantee optimum cover winding. Awning incline adjustable from 5 ° to 22 °.

Stobag Pergolino: Fabric Awning

Awnings: Hybrid Fabric Canopy

Page 2 of 2

**Cover Board**

The lowerable Volant-Plus valance, with a maximum height of 170cm, protects you from low sun and prying eyes.

**Telescopic Arm Technology**

The telescopic arm technology developed by Stobag keeps the fabric constantly under tension, in a simple and space-saving design.

**Valance**

The valance, which is available in various shapes, not only brings you additional shade, it also serves as a cover for the awning arms when retracted.

**Projection**

Minimum projection being 140cm. Maximum being 600cm.

**Width**

Minimum width being 100cm. Maximum width 700cm. *from 601cm with 3 guide rails

**Motorised**

All Stobag products can be remotely controlled.

**Wind**

Beaufort Scale 5. The wind resistance class can vary depending on version and dimension.
